WebPlus X5

Overview

No HTML knowledge required
Design websites the easy way! There's no need to learn any complicated coding language: WebPlus X5 automatically writes the HTML code for you. All you have to do is decide what you want on your site then drag and drop it into the design area.

All you need in a kit
WebPlus X5 is packed with a massive range of features – everything you need to create your perfect website. There's built-in photo editing, online forms, forums, blogs, RSS feeds, music & video streaming plus much more.

Secure e-commerce
We've teamed up with top providers, including PayPal™, so you know your online store will be safe and easy to use for both you and your customers. Setting it up is easy, too – a step-by-step wizard helps you to create your store painlessly.

Great for any business
Get found online with built-in search engine optimisation. Plus there are handy forms, maps, analytics and more! And there are no limits with WebPlus X5 so, unlike other programs, you can have as many sites, pages and shop items as you want!

WebPlus X5

New Features

This release of WebPlus makes designing websites easier and faster – even if you've never done it before!

Button Studio

The built-in Button Studio is the easy way pace to create everything from a single, clickable button to a fully-functioning site navigation bar.

Simply design one button and the intelligent resizing in WebPlus X5 will automatically create a stylish navigation bar. Buttons are instantly added and deleted as you add and delete web pages and you can create 'rollover' states so the look of your buttons change when the mouse is hovering over them.

Navigation bar designer

Fresh new navigation bars and a smart new designer for custom styling make it easy to give your sites a contemporary look with polished navigation.

Actions and interactivity

Apply "actions" to objects to interact with visitors, popping up text or revealing an item. Ideal for showing extra information without cluttering your website.

Smart panels

These smart panels are great for showing extra information, like contact details or captions, on your website.

Panels can contain anything, appear on command, and can float fixed in place as your page is scrolled. They can be displayed permanently or set to pop-up or vanish when a visitor hovers their mouse over, or clicks on, any button or image of your choosing.

Pop-up lightboxes

Showcase full-size images, whole albums, forms, etc. in stylish pop-up lightboxes that look fantastic and give your content the focus it deserves.

PayPal® mini cart

Make it easy for shoppers to see what's in their cart. The PayPal Mini Cart pops up when shopping to inspire confidence and make buying easy.

Other new features

Upgrade wizard
Seamlessly import all your own content and settings when upgrading from WebPlus X4 to WebPlus X5.

Better compatibility
Import the latest file formats. WebPlus X5 supports efficient SVG web graphics and Word 2010 files.

Templates and graphics
New, professionally-made web graphics (including pre-made navigation bars) and templates offer stylish, contemporary designs to choose from.

Quicker and easier to use
WebPlus X5 is faster, more intuitive, and efficient so you can design and update your websites quicker than ever.

And there's more...

- Take visitors straight to Street View with our improved and more powerful Google Maps™.
- Photos and graphics will look super-crisp and clean thanks to a new "best quality" export setting.
- Change all the colors on your website with one click using redesigned and versatile color schemes.
- Improved image editing in the PhotoLab.
- Better memory management makes WebPlus X5 more efficient.
- Web forms and color schemes have been enhanced.

"...WebPlus includes all the features you're likely to need and it's a perfect fit for the home and small business."*
